

CV

Anna Fonseca is B.Sc. in Geology (University of Alaska Fairbanks) and M.Sc. in Economic Geology (University of British Columbia). She worked as Contract Geologist for various mineral exploration companies, Mineral Assessment Geologist for the Yukon Government, Independent Consultant and since 2012 she is Principal Geologist in SRK Consulting (Canada). Anna has 25 years of international experience in regional to property scale structural and alteration mapping and 3D modelling, interpretations of remote sensing data, and exploration target generation in various hydrothermal deposit styles with a focus on porphyry-epithermal, CRD, skarn, and IOCG. She has taught field and classroom based structural and alteration mapping courses in university, in conferences, and in industry.
