

CV

Cristiana Ciobanu is a Senior researcher at the School of Chemical Engineering, Faculty of Engineering, Computer and Mathematical Sciences, University of Adelaide (Australia). She obtained her PhD from the University of Bucharest, Rumania, in 2000. She took up an ARC Postdoctoral Research Fellow position at the University of Adelaide/South Australian Museum in 2005 and moved to the University of Adelaide in 2010 to take up a Research Fellow role within the Deep Exploration Technologies Cooperative Research Centre, Department of Earth and Environmental Sciences. She worked on a full-time consultancy project for BHP Billiton Olympic Dam before moving to the School of Chemical Engineering in January 2015 to lead

the project 'Trace elements in iron oxides: deportment, distribution and application in ore genesis, geochronology, exploration and mineral processing (the 'FOX' project)'.
